Service Engineers for Diesel Generators (York, South Kirkby, Runcorn, Bristol, London)

Service Engineers required to carry out the maintenance and installation of diesel generators and peripherals either in situ at customer premises throughout the UK or based in our workshop at Pocklington Industrial Estate, York. Mechanical and electrical engineering knowledge preferred. Hands-on capability with installations and electrical work required.

Business Development Manager (South Kirkby) – to forge relationships with new customers.

NOTE TO RECRUITMENT CONSULTANTS AND AGENCIES – DO NOT CONTACT US. WE HAVE ESTABLISHED RELATIONSHIPS FOR SPECIFIC ROLES AND ARE NOT SEEKING ADDITIONAL ASSISTANCE.

Job Title: Service Engineers

Ref: PPS008

Location: Various locations throughout the UK (York, South Kirkby, Runcorn, Bristol, London)

THE JOB

We require Service Engineers to carry out the maintenance and installation of diesel generators and peripherals throughout the UK.

THE COMPANY

Power Plant Services is the after-market division of Yorpower Manufacturing Ltd. Yorpower is recognised to be one of the fastest growing and most successful suppliers of diesel generators and after-market support in the UK today. Our growth has been thanks to a simple approach - focus on our products and services and focus on our customers. We provide a rapid and comprehensive customer service, whatever the requirement and wherever in the world it may be. Around half our annual turnover is exported, and we have supplied customers in over 50 countries to date.

It's our people who make us so successful. And we make sure they know they're valued by recognising achievement and encouraging ambition – making sure everyone has a goal and knows what they need to do to reach it. In every area of the business, you will find dynamic and ambitious people, driven to be successful. With many positive times ahead, Power Plant Services (the after-market division of Yorpower) is seeking people to add a fresh perspective and bring their personalities to the company.

THE ROLE

We require Service Engineers to carry out the maintenance and installation of diesel generators and peripherals either in situ at customer premises throughout the UK or based in our workshops.

DAILY TASKS

- Carry out minor and major services to diesel engine generator sets at customer sites
- Visit customer sites to perform site surveys in order to assist in project design and proposals
