- **Service**
- **Planned generator maintenance**
- **Breakdown cover and 24/7 callout**
- **Project management**
- **Installation and commissioning**
- **Load bank testing**
- **Spare parts supply**

Yorpower provide a comprehensive service for the generator after market. We have a dedicated aftermarket support team who manage our OEM spare parts supply, maintenance and repair services.

We back this up with competitive labour rates and spare parts pricing, as well as industry-leading parts availability. This enables us to provide an assured, quality service at affordable prices.

We are accredited to ISO9001:2000, and this ensures our service division performs to the highest standards consistently and expediently, ensuring our customers receive the service they expect and rightly demand.

Planned Maintenance

Whether your generator operates 24/7 or as a standby unit, we offer maintenance contracts tailored to your needs. From minor service to major overhauls, Yorpower provide a quality service to ensure your generator operates with minimum downtime and at optimum efficiency.

Yorpower will plan, oversee and perform your generator installation and commissioning works, including project management and procurement of ancillary equipment as required. We can perform this on a turnkey basis or working jointly with other customer subcontractors as required.

Breakdown and 24 hour callout

If your generator fails for any reason, you can be assured of an immediate response from our service team. Our engineers have combine a wealth of experience with a capability to completely overhaul generators. This experience and knowledge combine to ensure Yorpower can support any generating set we are called out to.

For customers who require the added assurance of 24 hour emergency call-out, we can provide this in combination with a maintenance contract.

Spare Parts

Whatever your requirement for spare parts – from failed bulbs to maintenance kits to a complete engine rebuild, Yorpower can supply the spare parts for almost all generators and engines in operation today. We can also make informed recommendations on spare part holdings for customers who wish to perform their own maintenance.

We hold a large stock of fast-moving spare parts , and through our supply chain partners can provide all other parts very rapidly. This ensures our customers can maximise their generator set availability.

Load Bank Testing

To provide absolute assurance in proving your generator or UPS capability, Yorpower have load bank testing facilities – either static or mobile. We can test upto 1750kVA sets at our facility near York; alternatively we can offer our mobile load banks on hire. These can be transported to any part of the UK, and can provide testing capability upto 900kVA. Some of the features of our load bank testing capability include:

- Load steps selectable in 1kW stages
- Selecable mains powered fan for ease of testing
- Accept & reject buttons enabling load step testing and removal
