

Yorpower Manufacturing Ltd

***Diesel Generator Sales, Hire, Service,
Spares, Refurbishment & Maintenance***

Power Systems Designed for You

At Yorpower we supply generator power systems on which you can depend. Whether you rely on the power system 24 hours per day or 1 hour per year we believe in consistent performance.

Not only can you expect to depend on our product, you can be assured of high quality build and engineering at an affordable price.

Powerful Choices

The Yorpower standard range extends from small 5kVA units through to 2200kVA with proven engine and generator combinations.

Engines used by Yorpower include prestigious makes such as Perkins, Cummins, Volvo and Lister. Generators used are either Leroy Somer or Newage Stamford which are both World market leaders.

These proven combinations make these systems efficient, cost effective to maintain and also complete with long life cycles.

Providing All Options

Giving You What You Need

Whether you require a simple key start generator to multiple auto synchronising power stations, Yorpower is the company to fulfil these needs.

Yorpower power systems are available with a wide range of both standard and custom built options, such as automatic mains failure, sound attenuated and weather proof enclosures, remote communications, and more. The result is you get what you require.

Power Solutions in a Confus

ing World

Whatever the Application YORPOWER has a Solution

Yorpower produce power systems for a wide variety of applications from private residences to large industrial users.

Our power systems can be found the world over, powering businesses, telecommunication networks, banking and commerce, hospitals, public services and much more.

The Yorpower Systems Division can design your system from groundup beginning with an assessment, through installation and commissioning to handing over.

Assistance from the Start

Years of experience enable Yorpower to guide you through the options and decisions of selecting the right power system and control for the job.

Once a design is established our CAD systems are used to ensure accurate, good engineered designs that are a pleasure to operate and maintain whilst being robust for the many differing world locations.

And from the Startup

Once a system suitable to your needs has been supplied, the Yorpower aftermarket sales team are available to support the unit throughout its life.

The support available includes worldwide transport, installation, commissioning, spare parts and maintenance of your power system through Yorpower's Service Division and our worldwide support centres

Our own GenSpare parts brand is available for the maintenance of your unit, assuring you of high quality components.

Power Your World...

Yorpower offers a wide range of power system solutions as detailed below. These are our major options, but if you do not see an option you require please contact your dealer or the Yorpower help desk.

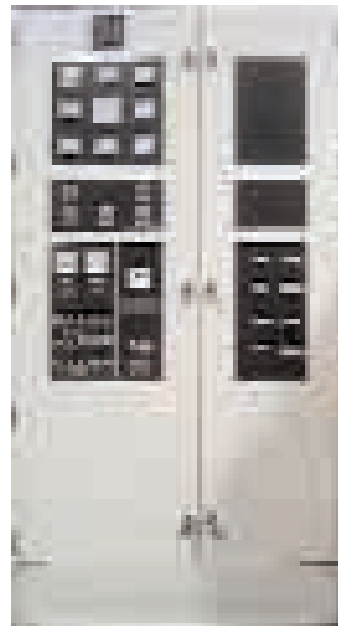

Power Systems

- 5 – 2200kVA diesel fuelled power systems
- 5 – 1000kVA gas fuelled power systems
- Special build turnkey solutions to suit applications

Control Systems

- Standard key start systems
- Automatic mains failure systems
- Multiple generator synchronising panels (upto 8 units)
- Mains Synchronising Systems
- Black start systems
- Telecommunication Dual Standby Systems
- Remote monitoring systems

Enclosures and General Options

- Weatherproof enclosures and containers for all models
- Compact acoustic enclosures upto 800kVA
- Acoustic containerised generators upto 2200kVA
- Attenuation equipment for indoor installation
- Mobile units for on or off-highway towing
